New Horizons: From Research Paper to Pluto

Authors: P. Tavner

[View research catalog entry for this paper](#)

Year: 2015

Pages:

Abstract:

NASA's New Horizons mission, part of the New Frontiers Program, is expected to reach its primary target - the dwarf planet Pluto - on July 14 2015. Mendeley was invited to visit NASA HQ during the close approach of Pluto and will be at NASA HQ on the day of the encounter. This report was written to mark the occasion and to share our excitement at being present for the event.

Mendeley Web

The screenshot displays the Mendeley Web interface. On the left, a sidebar shows the 'MY LIBRARY' section with options for 'All Documents', 'Favorites', and 'My Publications'. Below these are 'FOLDERS' including Economics, History, New Horizons, Nihilism, Philosophy, and Politics. At the bottom of the sidebar are 'GROUPS' and 'TRASH'. The main area lists documents in a table with columns for selection, star status, document title, author, and date. The first document, 'New Horizons: From Research Paper to Pluto' by Tavner P. (2015), is selected. On the right, a 'Details' panel for this document shows a 'Report' type, an 'Edit' button, the title, author, and a paragraph of text about the New Horizons mission. Below the text is a 'URLS' section with a link to 'www.mendeley.com/new-horizons.pdf'. At the bottom of the details panel is a dashed box with a cloud icon and the text 'Click or drag file here'. The bottom of the interface shows a pagination bar indicating '1 to 50 of 153' items.

Estructura de la biblioteca

The screenshot displays the Mendeley Desktop application window. The interface is divided into several sections:

- Left Sidebar:** Contains navigation options under "MENDELEY" (Literature Search, Mendeley Suggest), "MY LIBRARY" (All Documents, Recently Added, Favorites, Needs Review, My Publications, Unsorted, The Lancet, Create Folder...), and "GROUPS" (Create Group...). A "Filter by My Tags" dropdown is also present.
- Top Bar:** Includes icons for Documents, Folders, Related, and Sync, along with a search bar.
- Central List:** A table titled "All Documents" with columns: Authors, Title, Year, and Published In. The selected document is "Mendeley - A Last.fm For Research?" by Henning, V. et al., published in 2008.
- Right Panel:** Provides details for the selected document, including its type (Journal Article), title, authors (V. Henning, J. Reichelt), journal name (2008 IEEE Fourth International Conference on eScience), year (2008), and an abstract.

The status bar at the bottom indicates "1 of 6 documents selected".

Mendeley - A Last.fm For Research?
Authors: V. Henning, J. Reichelt
Type: Journal Article
Journal: 2008 IEEE Fourth International Conference on eScience
Year: 2008
Abstract: This paper aims to explore how the principles of a well-known Web 2.0 service, the world's largest social music service "Last.fm" (www.last.fm), can be applied to research, which potential it could have in the world of research (e.g. an open and interdisciplinary database, usage-based reputation metrics, and collaborative filtering) and which challenges such a model would face in academia. A real-world application of these principles: "Mendeley" (www.mendeley.com), will be demoed at the IE...

Mis publicaciones

The screenshot shows the Mendeley Desktop application window. The top menu bar includes File, Edit, View, Tools, and Help. Below the menu is a toolbar with icons for Add Files, Folders, Related, Share, and Sync. The left sidebar contains a 'Mendeley' section with a search icon and 'Literature Search'. Below this is 'My Library' with options: All Documents, Recently Added, Favorites, and My Publications (highlighted with a blue bar and a grey arrow pointing to the main content area). Under 'My Library' is a 'Create Folder...' button. Below that is 'Groups' with a list of groups: Mendeley for Librarians, Acceso abierto y Repositorios, altmetrics, Library and Information Science, and Mendeley for Librarians, followed by a 'Create Group...' button. At the bottom of the sidebar is 'Trash' with 'All Deleted Documents'. Below the sidebar is a 'Filter by Authors' dropdown menu set to 'All'. The main content area has a header 'My Publications' with an 'Edit Settings' button. The main area is dark grey and contains the text 'Podemos autoarchivar nuestras publicaciones en Mendeley. Estarán vinculadas y visibles en nuestro perfil'. Below this is the text 'Track your published research'. A white box with a dashed border contains the text 'Drag and drop papers you've authored here (or click to add papers manually)' and a 'What's this?' button. At the bottom of the main area is a note: 'Note: PDFs will be publicly available for download from your profile.'

☐ **Journal:** *Genome Research*

☐ **Year:** 2010

☐ **Volume:** 20

☐ **Issue:** 4

☐ **Pages:** 413-427

☐ **Abstract:**
Global studies of transcript structure and abundance in cancer cells enable the systematic discovery of aberrations that contribute to carcinogenesis, including gene fusions, alternative splice isoforms, and somatic mutations. We developed a systematic approach to characterize the spectrum of cancer-associated miRNA alterations through integration of transcriptomic and structural genomic data, and we applied this approach to generate new insights into melanoma biology. Using paired-end massively parallel sequencing of cDNA (RNA-seq) together with analyses of high-resolution chromosomal copy number data, we identified 11 novel melanoma gen...

The screenshot displays the Mendeley Desktop application interface. The main window shows a document titled "New Horizons" with the following content:

New Horizons

The New Horizons mission received approval in November 2001¹. Its objective was to send a spacecraft to Pluto - the only unexplored planet (still recognized as a planet at that time) in the solar system. Previous missions intended to reach Pluto - including Pluto Fast Flyby and Pluto Kuiper Express - had been cancelled, but after a thorough new profile selection process, NASA committed to launching New Horizons as part of its New Frontiers program.

Due to the distances involved - New Horizons would have to cover nearly three billion miles to reach its objective - it was designed to have as little mass as possible, but would be launched using the huge Atlas V expendable launch vehicle. This guaranteed the greatest possible velocity for the craft.

When the mission launched on 19 January 2006, the probe left Earth on a solar system escape trajectory of 37,000 mph. It crossed the Moon's orbit just eight hours and thirty-five minutes after lift-off, and reached Pluto 78 days later. The probe gained a gravity boost from the gas giant Jupiter to accelerate past 51,000 mph, but over eight years to travel to its objective. New Horizons is expected to make its closest approach of Pluto on July 14, 2015².

Phoning Home

Communicating with a probe three billion miles from Earth poses a number of challenges for the New Horizons team. Luckily, they can rely on NASA's Deep Space Network

Annotations:

- 1. **Radioisotope Thermoelectric Generator (RTG)**
Provides electrical power produced by plutonium-238 fuel.
- 2. **Alice**
A sensitive ultraviolet imaging spectrometer used to study atmospheric composition and structure.
- 3. **Ralph**
Imaging apparatus used to photograph and map surface details during the encounter.
- 4. **Venetia Burney Student Dust Counter (SDC)**
Designed by students at the University of Colorado at Boulder. Measures concentration of dust particles.
- 5. **Long Range Reconnaissance Imager (LORRI)**
Camera and telescope apparatus used to take photos of target at longer ranges.
- 6. **Solar Wind Around Pluto (SWAP)**
Instrument used to measure solar wind activity in the vicinity of Pluto. Also measures atmospheric escape.
- 7. **Pluto Energetic Particle Spectrometer Science Investigation (PEPSSI)**
Directional energetic particle spectrometer. Used to study energetic particles in Pluto's atmosphere.
- 8. **Radio Science Experiment (REX)**
Performs radio science experiments on Pluto's atmosphere.

Cita

con el *Mendeley Citation Plug-In*

Instalación del *Citation Plug-in*

LibreOffice
The Document Foundation

La barra de citas aparece automáticamente en Word

Mac / LibreOffice

Windows

Genera citas en texto en Word

1. Pulsa 'Insert Citation'

2. Busca por autor, título o año, o selecciona un documento de tu biblioteca de Mendeley

3. Selecciona el artículo o libro y pulsa 'ok' para citarlo automáticamente en Word

Encuentra una referencia en tu biblioteca

1. Pulsa "Go to Mendeley"

2. Aparece el botón 'Cite'

Editar y añadir información a las citas

1. Selecciona la cita y pulsa 'Insert or Edit Citation'

2. Pulsa en la cita
(aquí: 'Carroll 2011')

3. Utiliza el *Citation Editor* para añadir números de página, otra información u ocultar el autor

Unir citas

Insertar la bibliografía

The Mendeley Citation Plug-in makes it easy to insert citations into your research.(Henning & Reichelt, 2008)

1. Pulsa
'Insert
Bibliography'

2. Elegimos el
estilo de cita

3. ¡Hecho!

“Biblioteca viajera” para escribir trabajos en colaboración

Mendeley guarda una mini biblioteca con tu trabajo. Cuando abres un documento que contenga citas te preguntará si quieres añadirlas a tu biblioteca por si quieres estar al día de las referencias añadidas por otros miembros del grupo.

Añade las referencias en un lugar específico de tu biblioteca en Mendeley Desktop

Citar en otros procesadores de texto

Señalamos una referencia y pulsamos el botón derecho del ratón. Seleccionamos *Copy As Formatted Citation*.

Luego, en el procesador de texto, sólo tenemos que pegar la cita en la posición deseada. También funciona arrastrando y soltando

Documento sin título ☆

de Mendeley

Para activar Mendeley Institucional en tu cuenta:
busca el grupo institucional de la Universidad Complutense

The screenshot shows the Mendeley web interface. At the top, there is a navigation bar with tabs: Dashboard, My Library, Papers, Groups, and People. A search bar is located to the right of the Groups tab. Below the navigation bar, the main content area displays the group page for 'Universidad Complutense de Madrid'. A large, semi-transparent success message box is overlaid on the page, indicating that the user has successfully joined the group and been upgraded to a Mendeley premium plan. A red callout box points to the 'Join this group' button. The group page itself shows a list of members and a list of papers. The success message box contains the following text:

Success!

You are now a member of this group and have automatically been upgraded to a Mendeley premium plan.

OK

The group page also displays a list of papers, including:

- Alvaro Sanchez, Carmelo Vazquez in *The Journal of Positive Psychology* (2014)
- Preface: Psychology, Pedagogy, and Assessment in Serious Games by Thomas M. Connolly, Thomas Hainey, Elizabeth Boyle, Gavin Baxter, Pablo Moreno-Ger in *Psychology, Pedagogy, and Assessment in Serious Games* (2014)
- Towards a low cost adaptation of educational games for...

On the right side of the group page, there is a section for '139 members' with a grid of member avatars. A 'Share' button with social media icons (Facebook, Twitter, Email) is also visible.

The screenshot shows a Mendeley researcher profile for Victor Henning. The profile header includes a circular profile picture, the name 'Victor Henning', his degree 'Ph.D.', and his title 'Technology entrepreneur, investor, author' at 'Bauhaus University Weimar'. To the right of the header, statistics show '4 h-index' and '174 Citations'. Below the header, the profile is divided into sections: 'Research Interests' (listing Emotions, Decision Making, Theory of Reasoned Action, Intertemporal Choice, and Motion Picture Economics), 'About' (a bio paragraph), 'Publications' (listing a paper 'Giving the Expectancy-Value Model a Heart'), and 'Followers' (listing three followers: Candice Reynolds, Milena Moraes, and NITAI CHANDRA ...). The 'Publications' section also shows options to 'Save reference' and 'Get full text at journal'.

Comparative studies on single-layer reduced graphene oxide films obtained by electrochemical reduction and hydrazine vapor reduction

Authors: Z. Wang, S. Wu, J. Zhang et al.

[View research catalog entry for this paper](#)

Journal: *Nanoscale Research Letters*

Year: 2012

Volume: 7

Issue: 1

Pages: 161

Abstract:

The comparison between two kinds of single-layer reduced graphene oxide (rGO) sheets, obtained by reduction of graphene oxide (GO) with the electrochemical method and hydrazine vapor reduction, referred to as E-rGO and C-rGO, respectively, is systematically studied. Although there is no morphology difference between the E-rGO and C-rGO films adsorbed on solid substrates observed by AFM, the reduction process to obtain the E-rGO and C-rGO films is quite different. In the hydrazine vapor reduction, the nitrogen element is incorporated into the obtained C-rGO film, while no additional

Abstract

Graphene is the two-dimensional (2d) building block for carbon allotropes of every other dimensionality. It can be stacked into 3d graphite, rolled into 1d nanotubes, or wrapped into 0d fullerenes. Its recent discovery in free state has finally provided the possibility to study experimentally its electronic and phonon properties. Here we show that graphene's electronic structure is uniquely captured in its Raman spectrum that clearly evolves with increasing number of layers. Raman fingerprints for single-, bi- and few-layer graphene reflect changes in the electronic structure and electron-phonon interactions and allow unambiguous, high-throughput,

Abstract

While heated arguments between practitioners of qualitative and quantitative research have begun to test the very integrity of the social sciences, Gary King, Robert Keohane, and Sidney Verba have produced a farsighted and timely book that promises to sharpen and strengthen a wide range of research performed in this field. These leading scholars, each representing diverse academic traditions, have developed a unified approach to valid descriptive and causal inference in qualitative research, where numerical measurement is either impossible or undesirable. Their book demonstrates that the same logic of inference underlies both good quantitative and good qualitative research designs, and their approach applies equally to each. Providing precepts intended to stimulate and discipline thought, the authors explore issues related to framing research questions, measuring the accuracy of data and uncertainty of empirical inferences, discovering causal effects, and generally improving qualitative research. Among the specific topics they address are interpretation and inference, comparative case studies, constructing causal theories, dependent and explanatory variables, the limits of random selection, selection bias,

Mendeley Open API

Developer Portal

The screenshot displays the Mendeley API Developer Portal. The left sidebar contains a navigation menu with the following items: Introduction, Authentication, Versioning, CORS, Pagination, Documents, **Attributes** (highlighted), Retrieving a single document, Retrieving documents, Creating a document, Updating documents, Deleting documents and Trash, Catalog Documents, Trash, Files, Annotations, Groups, Folders, Profiles, Errors, and Sign Up for a Developer Key. The main content area is titled "Attributes" and features a table with the following data:

Parameter	Type	Description
id	string	Identifier (UUID) of the document. This identifier is set by the server on create and it cannot be modified.
type	string	The type of the document. Supported types: journal, book, generic, book_section, conference_proceedings, working_paper, report, web_page, thesis, magazine_article, statute, patent, newspaper_article, computer_program, hearing, television_broadcast, encyclopedia_article, case, film, bill.
month	integer	Month in which the document was issued/published. This should be an integer between 1 and 12.
year	integer	Year in which the document was issued/published.
day	integer	Day in which the document was issued/published. This should be an integer between 1 and 31.
source	string	Publication outlet, i.e. where the document was published.
title	string	Title of the document. This is a required field.
revision	string	Number identifying the item (e.g. a report number).
abstract	string	Brief summary of the document.
authors	array	List of authors of the document. This is a collection (array) of person objects, which include first_name and last_name (strings).

On the right side of the page, there is a section titled "cURL" with a sub-section "Example JSON" containing the following JSON data:
